ALLVIEW PLUS™

THE BEAUTY OF A BETTER VIEW

AllView Plus™ combines the timeless beauty of plantation shutters with a cleaner, more open design. Wider 34" panels create larger view-through openings that maximize natural light and outdoor views while minimizing visual interruptions.

More than a window covering, AllView Plus adds architectural elegance with thicker milled rails, wider top and bottom rails, hidden tilt operation, and recessed magnets for a seamless, sophisticated look.

Crafted from durable polyresin and finished with our exclusive DuraTex™ finish, AllView Plus delivers the rich appearance of painted wood with superior durability, easy maintenance, energy efficiency, and lasting beauty.

In addition, AllView Plus is available with an industry-leading 7-day lead time, so you can enjoy premium shutters without the long wait.

With premium design, enhanced visibility, and exceptional value, AllView Plus brings out the best in every window.

ALLVIEW PLUS™

Elevated Design

Without the Premium Price

Enjoy Bigger, Better-Views and new, wider 34 inch panels

Our innovative design reduces visual obstruction, allowing more of the outdoors to become part of your living space.

Maximize Natural Light

Larger view-through openings let more sunlight into your home, creating brighter, more inviting rooms throughout the day.

Timeless Style

The classic elegance of plantation shutters complements virtually any architectural style, from traditional to contemporary.

Superior Privacy and Light Control

Easily adjust louvers to achieve the perfect balance of privacy, sunlight, and comfort.

Built to Last

Crafted from premium materials and engineered for durability, AllView Plus shutters are designed to provide years of beauty and performance.

Your Custom Specifications, Designed & Perfected in the USA

By pairing local American design expertise with regional fabrication, we provide world-class custom shutters without the long overseas transit times.

“Expansive Views,
Beautifully Framed.”

“Shutters are the ultimate combination of elegance and functionality.”

“As Featured in Window Fashion Vision Magazine”

ALLVIEW PLUS™

- Polyresin surface features new proprietary DuraTex™ finish that gives the soft look and feel of painted wood.
- Easy to clean, low maintenance and much more durable than painted wood.
- The Poly construction has an open core reinforced with solid corner joint blocks and features superior insulation properties.
- The shutter features our AllView Plus hidden tilt rod system as a standard in every shutter.

Architectural Beauty, Engineered for the Elements

Our new DuraTex finish replaces traditional plastic-look coatings with a sophisticated premium matte surface that replicates real painted wood craftsmanship.

Save on Energy

AllView Plus’s poly construction has an open core reinforced with solid corner joining blocks, featuring superior insulation properties that provide big energy savings.

The Beauty of Full View Shutters

AllView Plus offers the elegance of shutters without the premium price for a great combination of beauty, function and value.

Recessed Magnets (Upgrade)

Recessed, round magnets create a subtle, low-profile look compared to surface-mount predecessors. Precision-drilled frames deliver better alignment and a more polished finished installation.

ALLVIEW PLUS™

DESIGN OPTIONS

Every Shutter is custom designed for your home. Choose from our selection of tilt rod placement, colors, louver sizes, and accent hinges. Tilt rods can be placed in their traditional location in front of the shutter or can be hidden to deliver clear unobstructed views.

- Lead Time: 7 Production Days

SHUTTER TYPES

STANDARD FOLDING SHUTTERS

Standard Folding Shutters are our most popular option, available as single or bi-fold panels to fit a variety of window sizes. Panels fold neatly against the wall for a clean look and easy access.

SPECIALTY SHUTTERS

As part of the ShutterSMART Family, AllView Plus is one of several shutter lines we build. For larger and taller panels, arch tops, and specialty shapes, ask your dealer about ShutterSMART PolyClad Wood shutters, custom built in North America and coordinated with AllView Plus.

FRENCH DOOR SHUTTERS

French door shutters feature a slimline frame that sits behind the panel for a clean, elegant look. Available with a solid frame or a cutout to accommodate traditional door handles.

T-POST SHUTTERS

T-Post Shutters are designed for large or wide windows, using a decorative center post to divide the shutter into smaller panels for added strength and smoother operation.

TRACK SHUTTERS

Designed for large windows and sliding glass doors, Track Shutters combine elegant style with lasting durability. The smooth-gliding track system and hidden tilt-rods provide unobstructed views while boosting your privacy and energy efficiency.

BI-PASS SHUTTERS

Bi-Pass Track Shutters are a space-saving solution for sliding doors and large windows. Smooth-gliding panels, optional double bi-pass functionality, and a decorative wood valance create a beautiful, functional finish.

Since 1991, ShutterSMART has been manufacturing premium custom shutters that combine timeless style with exceptional craftsmanship. Our shutters are designed for lasting beauty, durability, and energy efficiency, backed by fast, dependable lead times and personalized service.

PolyResin shutters are an eco-friendly choice with no VOCs emissions, no painting required, exceptional durability, and full recyclability. Plus, we recycle over one million pounds of PolyResin material annually.

The USGBC found that PolyResin performs better relative to environmental impact than alternative materials studied.

No emissions, VOCs or solid waste.

PolyResin is a fire resistant product certified by the California Fire Marshall.

PolyResin is 100% recyclable. If you ever want to change your window coverings, we offer a program to keep PolyResin out of landfills. Simply remove your shutters and call us to arrange a pickup.
